

Ethos of the School

The values of the Academy Trust can be seen in the diagram opposite, reflecting the values and ethos for staff and students.

The Academy is fully comprehensive, community driven, technologically rich and with the ethos of an outstanding education for all. This involves high and stretching targets, strong behaviour management and a rich, broad and balanced curriculum.

The Trust has a national reputation for using digital technology to support school improvement and we operate as a training and Showcase school for Microsoft which means that we regularly host visitors who learn from our staff and students. In the last few years, we have hosted educators from across the world from Australia to the United States. Our use of technology "levels playing fields" for our young people. It does not see colour or gender or faith but acts as a catalyst to help our students to realise their dreams and it gives them a skill set that sets them apart from other students.
